ZEELOT
INNOVATION LIMITED

ZEELOT INNOVATION LIMITED

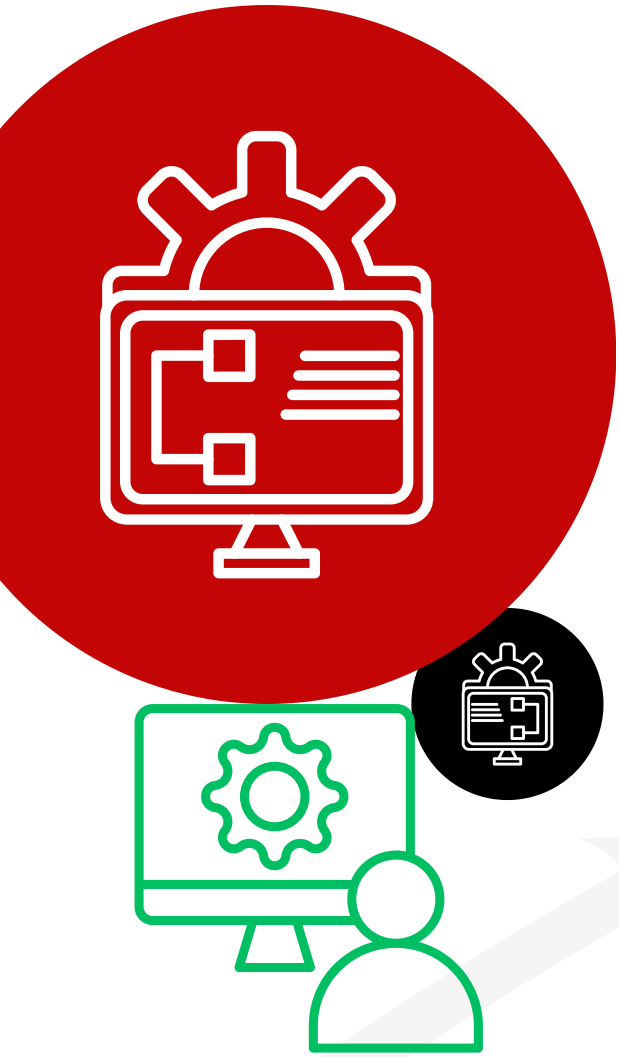

PROPOSED STRATEGIC IDEAS & RECOMMENDATIONS

Proposed to the Managing Director, **Mr Victor Isereke,** for the building of Zeelot Innovations Limited.

DATE:
18TH AUGUST, 2026

PRESENTED BY
PRAISE BASSEY
BUSINESS DEVELOPER

Executive Overview

Zeelot Innovation Limited presents an opportunity to build a technology-driven company positioned at the intersection of robotics, digital solutions, technology products, and emerging innovations.

PLEASE NOTE: The ideas presented in this document are intended as areas for exploration and further discussion, rather than final business decisions.

Proposed Business Direction

1. ROBOTICS & INTELLIGENT TECHNOLOGY

Robotics represents the primary area of interest for Zeelot Innovation.

Zeelot could explore becoming a company that introduces, deploys, integrates, and eventually develops robotics solutions for the Nigerian and wider African market.

SPECIFIC AREAS:

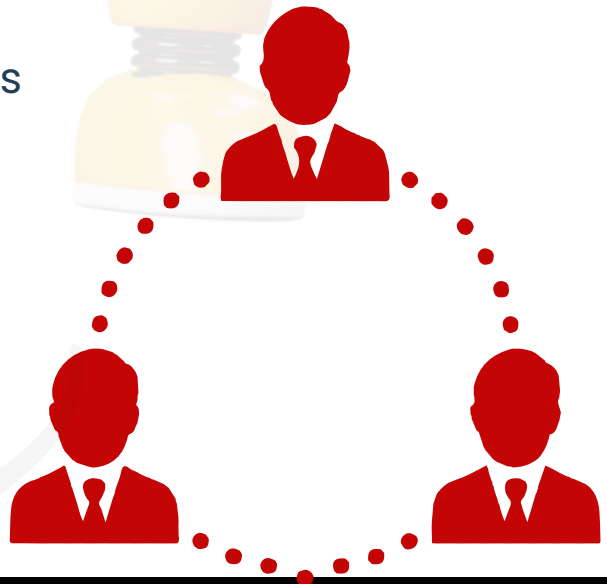

- Industrial automation
- Security and surveillance robotics
- Service robots
- AI-powered devices
- Smart-home automation
- Robotic training programmes

Proposed Business Direction

PROSPECTIVE CLIENTS

- **Industrial Organisations:** Automation and intelligent machinery.
- **Government & Institutions:** Technology-driven public-sector solutions.
- **Businesses:** Automation, security and operational efficiency.
- **Individuals** Smart-home and consumer robotics products.

Proposed Business Direction

2. GADGETS & DEVICES

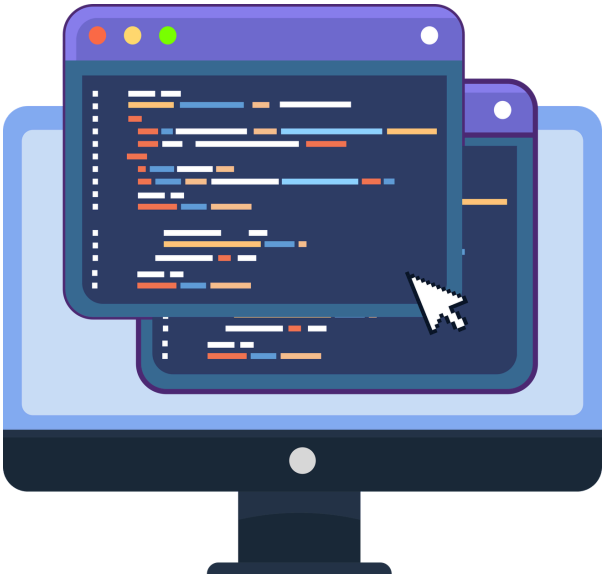

The business could focus on the sale and distribution of tech gadgets and innovative & smart devices.

POTENTIAL PRODUCTS

- Smart devices
- Smart-home products
- Laptops
- Cell phones
- Technology accessories

Zeelot could generate revenue through:
Product Sales → Distribution → Corporate Supply → Procurement → Installation & Support

Proposed Business Direction

3. SOFTWARE & DIGITAL SOLUTIONS

Zeelot Innovation could also render Software Solutions focused on helping organisations solve operational and business challenges through technology.

POTENTIAL SERVICES

- Custom software development
- Web applications
- Mobile applications
- Business management systems
- Customer management systems
- Inventory solutions
- School management systems
- Booking and reservation platforms
- E-commerce solutions

Proposed Business Direction

PROSPECTIVE CLIENTS

Zeelot Innovation could also render Software Solutions focused on helping organisations solve operational and business challenges through technology.

POTENTIAL SERVICES

- SMEs
- Schools
- Hotels
- Government institutions
- Corporate organisations
- Startups
- Professional service providers

CONCLUSION & RECOMMENDATION

Robotics should remain the long-term innovation focus, reflecting the original vision for Zeelot Innovation Limited

Software solutions and technology products can serve as practical **entry points and complementary revenue streams,** allowing the company to establish its market presence, generate revenue and develop relationships while gradually building its robotics capabilities.

PLEASE NOTE: The ideas presented in this document are intended as areas for exploration and further discussion, rather than final business decisions.

THANK YOU
